Winter Storm

In the picture: Heavy snow fell across northern Arkansas on February 4-5, 2004...with heavy rain across central and southern sections of the state.

A winter storm produced a variety of winter weather across parts of western and northern Arkansas starting late in the afternoon of the 4th and continued into the early morning hours of the 5th. Snowfall totals across north Arkansas generally ranged from 4 to 6 inches. Numerous roads were snow covered and hazardous. Meanwhile, a combination of sleet and freezing rain affected parts of western Arkansas. Ice accumulations of 1 to 2 inches were reported over Polk County, with trees and power lines downed by the weight of the ice.

ARKANSAS, Central and North Central

In the picture: Cars at a department store in Sherwood (Pulaski County) became snow covered during the evening of February 14, 2004.

A mixture of snow, sleet and rain began falling over portions of western Arkansas during the morning on the 14th. The precipitation gradually moved into central Arkansas during the afternoon hours. All of the precipitation eventually changed over to all snow by late afternoon and continued into the early morning hours of the 15th. A band of heavier snow, generally from 2 to as much as 6 inches, fell from Mena, across Hot Springs to Little Rock. A number of roads were snow covered and hazardous.
